

Concurrency Theory CGE043

Paper Writing Exercise

Due : 30 Oct 2022, 23:59

Weightage : tbd

The objective of this exercise is to give you a practise in formal writing. Expected learning outcomes (or criterion for evaluation)

- Technical correctness.
- Able to organize the contents in space, give a structure to your document.
- Able to mathematically formalise your ideas.
- Notational clarity.
- Pedagogical narration.
- Proper citations/credits where necessary
- Typesetting your document well (using \LaTeX)

Your task is write a research article presenting the decidability results of communicating finite state machines over acyclic topology, as we discussed in the class. Page limit: 5 pages in LIPICS format, including references. Here is a template on overleaf. Please submit a pdf of your article on Moodle 23:59, 30 Oct, 2022.

Self assessment : Your article is a success if a fellow batch-mate who has not taken CNTH can read and understand it.
